

The Client

A fast growing Electrical Machines and Drives company based in Sheffield develops and deliver motors, generators to range of industries.

Job Position filled

To recruit number of specialist role which are considered to be hard to fill due to very niche industry.

Electromagnetic Engineer / electrical design engineer
Programme Manager
Mechanical Design Engineer
Draughtsman

Finding the Solution

To complete the requirements Tech-hiring used the multiple sourcing strategies as-

- Conducted industry research and headhunt potential candidates from the competitive companies.
- Formulated advanced search techniques to find out the potential candidates on the web.
- Carried out in depth phone and face to face interviews with the candidates.

As a result Tech-hiring successfully fulfilled the challenging requirements within the deadline.

Client testimonials

We used Tech-Hiring as our sole recruiter on a very demanding electrical design engineer placement after failing to find suitable candidates through advertising or by using larger agencies. Tech-Hiring was rapidly able to locate and put forward a number of highly appropriate candidates and we have since made a successful appointment.

We continue to use Tech-hiring for our recruitment and would not hesitate to recommend their efficient and proactive service
