Job Positions filled

To recruit for a technical position which is considered very challenging.

Project Engineer
Stress Engineer (FEA)

Finding the Solution

Due to the nature of the requirements Tech-hiring adopted 'the focus approach' to attract and screen the candidates.

- Undertaken the industry research and targeted the potential candidates through social media and search engines.
- Search in-house and external databases
- Advertise on leading newspaper and job boards to attract the best talent.
- Carried out in depth phone and face to face interview with the candidates.

As a result Tech-hiring successfully fulfilled the challenging requirements within the given deadlines.

Client testimonials

This is to state that we have recently used the services of Tech-Hiring Ltd and have found their support most useful. We have been in the past reluctant to use recruiting companies as we were afraid that they will not be able to fulfil our requirements due the specialised nature of our work. This time we were looking for a highly skilled engineer for our technical consulting company.

However, Mr Singh's personal attention to this recruitment meant that we were able to find the most suitable and able candidate for this job. We will have no hesitation in using the services of Tech-Hiring in future and recommending to others.

Managing Director
